Reminder to have your molab account and your OpenAQ API key if you want to run the notebook to follow al

# Tutorials (part II)

We'll work with the same note book as before.

**Step 1:** Go to [this link](#) to create a notebook session for this tutorials

**Step 2:** Once you're in the link:

- Click “Fork” at the top of the page. You will be prompted to log in to your molab account if you're currently logged out.
- Once you have logged in, you will be automatically redirected to your own forked version of the notebook on the web.
- The notebook is yours to play with and will also be accessible to you via your molab homepage.

Reminder to have your molab account and your OpenAQ API key if you want to run the notebook to follow al
